Profile

Versatile Data Analyst with 5 years of experience across healthcare (NHS), logistics, compliance, and financial sectors. Track record of managing enterprise-wide ML projects, detecting fraud patterns, and optimizing supply chains through data-driven solutions. Delivered £450,000 in cost savings and reduced operational risks by 15% through predictive modeling. Expert in SQL, Python, Power BI, and AWS, specializing in transforming complex datasets into actionable insights across regulated industries.

WORK EXPERIENCE

NHS

Nov 2024 - Present

Data analyst

- Extracted, cleaned, and analyzed large-scale datasets (QOF, LES, NIS) using NHS Arden & GEM systems to support clinical decision-making for over 30,000 patients.
- Developed automated dashboards and KPI reports, reducing manual reporting time by 40% and improving visibility of patient outcomes across departments.
- Wrote and optimized complex SQL queries to access and manipulate NHS databases, improving data accuracy and retrieval speed by 25%.
- Conducted trend analyses and cohort segmentation to identify high-risk patients, enabling targeted interventions and contributing to a 15% increase in preventive care uptake.
- Ensured data quality and compliance through regular audits and alignment with NHS data governance standards, supporting safe and ethical use of health information.

Serco

Dec 2023 – Aug 2024

Data Analyst

London, UK

- Led risk analytics and fraud detection initiatives across 12 departments, developing automated monitoring systems to identify suspicious patterns in £millions of operational spend
 - Engineered fraud detection algorithms using SQL and Python, resulting in identification of anomalous spending patterns and potential compliance violations
 - Designed real-time Power BI risk monitoring dashboards enabling stakeholders to track key risk indicators and compliance metrics
 - Implemented predictive models for early detection of spending anomalies, reducing fraud exposure by 15%
- Spearheaded data-driven compliance initiatives:
 - Conducted risk assessment of vendor relationships, identifying high-risk patterns and potential compliance issues
 - Developed automated risk scoring system for vendor evaluation using multiple data sources
 - Led cross-functional collaboration with audit and compliance teams to enhance monitoring processes
- Transformed risk management through data analytics:
 - Reduced operational risk exposure by 10% through data-driven policy reforms
 - Generated £450,000 in savings through risk-based vendor optimization
 - Implemented automated compliance monitoring systems across departments

Transolved

Mar 2022 – Jun 2023

Data Analyst

London, UK

- As a Data Analyst, I designed and deployed scalable data infrastructure to support cross-sector ML and analytics projects across mining, education, and tech clients.
- Led end-to-end implementation of ETL pipelines and data warehousing solutions using Python, SQL, and AWS services.
- Engineered ML model versioning and deployment system on AWS S3 and RDS, enabling seamless collaboration across multiple data science teams.
- Conducted A/B testing and statistical analysis using R and Python to inform product decisions for a consumer-facing chat app.
- Built interactive Power BI and R Shiny dashboards, integrating finance, student, and operations data for a university, enhancing visibility for 10+ departments.
- Delivered predictive modeling solutions for a mining company, improving mineral yield classification accuracy and informing high-impact extraction strategies.

Mastery Logistics

Oct 2020 – Mar 2022

Data Analyst

New York City, NY

- Developed and maintained KPI dashboards to track performance in delivery, inventory turnover, and supplier reliability.
- Conducted root cause analysis on supply chain disruptions to minimize stockouts and improve operational flow.
- Performed root cause analysis on supply chain data (Challenge), identifying and resolving bottlenecks (Action) that improved operational efficiency by 15% (Result).
- Partnered with cross-functional teams to implement data-driven solutions (Challenge), which increased order fulfillment speed by 15% (Action and Result).

EDUCATION

University Of East London

BSC Hons, Computer Science (1st Class)

August, 2021

London, UK

SKILLS

Technical Skills: SQL (SQL Server, MySQL, PostgreSQL), Python (NumPy, Pandas, Matplotlib, SciPy, Seaborn), R, Excel (Vlookups, Pivot tables, Macros), SPSS, Tableau, Power BI, RDBMS, SQL Server, AWS S3, Azure (Data bricks, Datalakes, Data warehouse), NoSQL, Big Query, Looker, Apache Airflow, AWS Redshift, Snowflake, Oracle, MatLab, DAX, Power Query, Jupyter Notebook, Git, GCW, AWS, SAP, Oracle SCM, JDA, Agile, Concur reporting, LMS, System Analysis & Decommissioning, Risk Mitigation, Digital Transformation, Communication Planning, Data Migration, Data Extraction, Data Manipulation.

CERTIFICATIONS

JUST IT: Data science bootcamp, Utilised Excel, Access, SQL, Azure, AWS, Python, Power BI, R, and Tableau. (08/2023 - 11/2023)

Google Data Analytics Professional

Microsoft Certified: Azure Data Scientist Associate
